

Horizon

Powering today's workforce
- anyone, anywhere, anytime.

Horizon business phone system

Business telephony has evolved and it is likely your current business communications can be improved with a cloud business phone system.

Horizon sits in the cloud. This vastly increases the capabilities, improves the reliability and customer experience of your business.

Horizon allows your business to optimise your business investment, improve your customer satisfaction, retain talented staff and save time and money.

Business optimisation

Allow your business to proactively plan resources based on tangible data, as well as respond to any unplanned events.

Improved customer experience

Enable your business to deliver a consistent and seamless experience to your customers, regardless of their location.

Staff effectiveness

Collaboration through Horizon improves your business outcomes by aiding each member of staff to be more efficient and productive.

Staff satisfaction

Create a positive work environment with flexible working arrangements that enhance employee experience and prioritise their well-being.

Service excellence

Working with a single supplier with a SLA of 99.95%* ensures a consistently high service quality to your customers.

*Horizon Core Service Availability

Powering today's workforce

anyone, anywhere, anytime

Businesses have also evolved. Adapting to the 'work anywhere' trend can be important for businesses.

Moving to a hosted business phone system removes the need for employees to be on the business premises to work collaboratively and efficiently with colleagues.

Horizon allows a consistent quality service for your customers, wherever your workforce are working.

Horizon has both fixed and mobile capabilities which are accessed through an easy-to-use portal and app allowing users matched capabilities at home or on the move.

60,000+

UK companies use **Horizon** telephony systems.

750,000+

users trust **Horizon** for their business phone system.

PSTN Switch off

BT Openreach announced it is switching off the PSTN (and ISDN) network in 2025, which means everyone, including businesses, currently using PSTN-based services will need to move to another service before then.

Find out how Horizon can help your business effectively manage the PSTN switch-off.

Workers in Great Britain work at least one day from home a week*

Healthcare+ Medical Practice

As GP services are growing in demand, Healthcare+ Medical Practice found itself struggling with increasingly high call volumes and being unable to process them in an orderly, professional manner.

A recent outage of the phone system highlighted to management that a change was needed to ensure patient safety and business continuity.

Horizon offered Healthcare+ Medical Practice increased benefits and capabilities compared to their previous, non-cloud telephony system including:

Auto attendant - greets the caller and allows them to choose the service they require from a list. This helps cut down on the time patients spend waiting in queues and gets them to the right operator.

Call queueing - allows patient's calls to be queued before they are delivered to a handset at the practice. Comfort messages can be played too, which will give patients reassurance that their call will be answered soon and provide information such as opening hours.

Sophisticated statistical analysis - of inbound and outbound calls can help identify the busiest periods to help plan for staff scheduling.

Integration with industry - specific CRMs - can keep a record of call history and interactions with patients, as well as screen-pops on inbound calls to improve customer service.

Receptionist console - helps reduce the time it takes for a call to come in and be transferred to the necessary department or individual. The ability to re-order the queue is important, as some calls may need to be dealt with quicker than others in case of emergency. 'Presence' allows the receptionist to check who is available before transferring the call.

Business continuity - respond to unplanned events to ensure a continuity of service to patients.

Effectively manage unexpected situations with prompt and decisive action.

Saves money

Work with a single supplier offering best in class service level agreement.

Reliable Recruitment Ltd

Hybrid working is a hot topic for businesses. Staying competitive within today's jobs market to ensure the retention of valuable talent within your organisation means many companies are considering a more flexible approach to the 9-5 office environment.

As a growing business with over 30 members of staff, Reliable Recruitment are aware they could be providing a higher level of staff satisfaction to their workforce. .

Implementing Horizon has increased benefits and capabilities compared to their previous, non-cloud telephony system including:

Collaborate - the agents can conduct screening video interviews and make calls from mobiles to candidates.

Integrator CRM - a client record will pop up on the agents screen when they call in, enabling the agent to answer the phone accordingly, by linking to Outlook or their CRM system.

Call reporting tool - allows managers to check staff productivity and then apply necessary training or call routing adjustments where necessary.

Call recording - for the purpose of quality monitoring and training.

Smartphone app - the recruitment agent is able to make and receive calls anywhere. This means agents can be contacted wherever they are and can be accessed using one number.

Twinning - the agent can receive calls on their mobile when an inbound call is received.

Music and messages on hold - give off a professional image while callers are waiting for their calls to be answered. Likewise by using an auto-attendant clients and candidates will be able to get through to agents faster and ensure they reach the correct department.
